

Our Mission

Our number one goal at Dusty Ducts is **integrity**. It is the mission of our company to provide the **highest quality work**, accomplished through **accountability** to our customers and a **strong work ethic**. Customer **satisfaction** is imperative and we feel that by keeping the highest level of integrity we will achieve our mission.

We are a woman owned business known for our excellent quality, reliability, and service. Our regional area includes ten states on the East Coast, with plans to expand into six more states. Dusty Ducts, Inc. has been providing a wide range of Indoor Air Quality services since 1990.

We are an Indoor Air Quality company born out of an HVAC installation and service company. Our background gives us extensive knowledge in HVAC systems and equipment. We have found this to be an invaluable tool when confronting sensitive air conveyance system components and equipment. We are an active member of the following associations:

- National Air Duct Cleaners Association (NADCA)
- National Air Filtrations Association (NAFA)
- Indoor Air Quality Association (IAQA)
- American Society of Healthcare Engineering (ASHE)
- National Fire Protection Association (NFPA)
- International Kitchen Exhaust Cleaning Association (IKECA)

what's your **IAQ?**

Indoor Air Quality
Since 1990

IAQ Solutions that work for your business.

BREATHE CLEANER. BREATHE BETTER.

70% of all buildings are estimated to be contaminated with Legionella
Up to 25,000 cases of Legionnaires' disease occur every year in the United States.*

*Data from the Centers for Disease Control and Prevention (CDC)

Is the air in your home or office making you sick?

The Environmental Protection Agency (EPA) estimates that indoor air pollutant levels may be two to five times higher than the pollutant levels outdoors. Americans spend up to 90 percent of their time indoors. Indoor air pollutants such as tobacco smoke, pollen, mold, dust, and animal dander can create asthmatic and allergic reactions.

flexible solutions for your IAQ needs

CLEANING SERVICES

Potentially harmful air pollutants can be present inside virtually any indoor environment, from homes to hospitals. Our approach is to develop an IAQ profile, which can provide useful information in developing a program for your company.

INVESTIGATIONS

The use of robotics when performing inspections provides us with the ability to detect, document, and present on video the results. Using state-of-the-art technology is a powerful tool when providing you with the best analysis.

REPAIR & REPLACEMENT

Dirt and microbes continuously impact, and are absorbed by HVAC insulation. Once contaminated, insulation is almost impossible to clean. With our twenty years of experience in sheet metal fabrication, installation, and duct sealing, let us take care of your needs.

WE'VE WORKED WITH A DIVERSE CUSTOMER BASE. HOW CAN WE SERVE YOU?

Healthcare Facilities. Government Facilities. Educational Facilities. Manufacturing Facilities. Commercial & Residential Properties.
